

W przeglądarce internetowej należy wpisać <http://192.168.0.1>

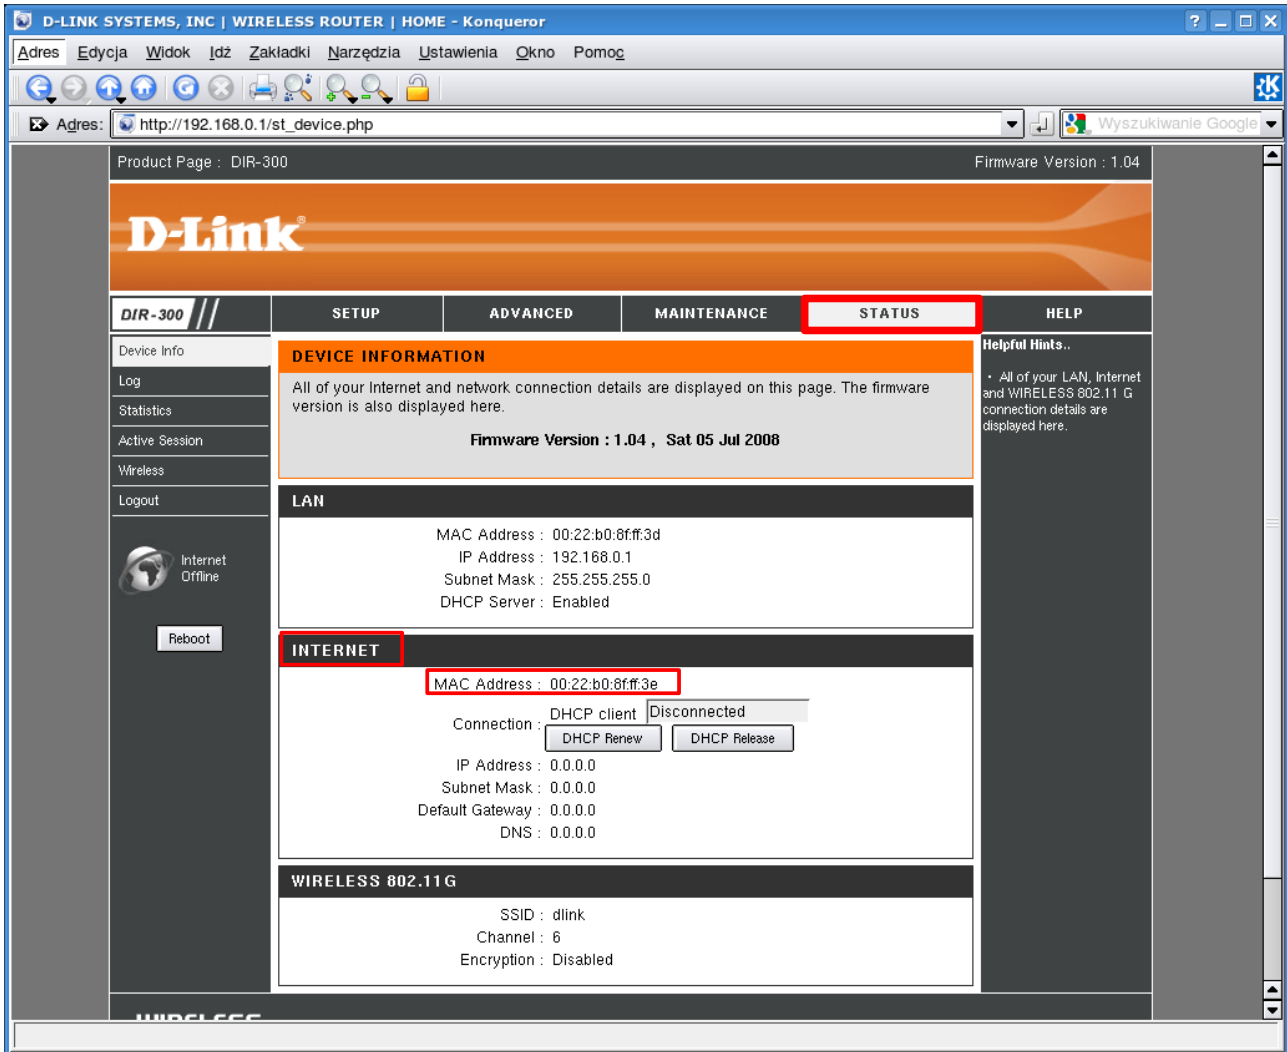

Pojawi się okno z pytaniem o login i hasło:

login: **admin**

hasło: pozostawić puste

W oknie które się pojawi kliknąć na **Status**

Z poniższego okna należy odpisać adres MAC z **INTERNET**

The screenshot shows a web browser window displaying the status page of a D-Link DIR-300 wireless router. The browser's address bar shows the URL [http://192.168.0.1/st\\_device.php](http://192.168.0.1/st_device.php). The page title is "D-LINK SYSTEMS, INC | WIRELESS ROUTER | HOME - Konqueror". The main content area is titled "Product Page : DIR-300" and "Firmware Version : 1.04". The D-Link logo is prominently displayed at the top. Below the logo, there is a navigation menu with tabs for "DIR-300", "SETUP", "ADVANCED", "MAINTENANCE", "STATUS", and "HELP". The "STATUS" tab is selected and highlighted with a red box. The status page is divided into several sections: "DEVICE INFORMATION", "LAN", "INTERNET", and "WIRELESS 802.11 G". The "INTERNET" section is highlighted with a red box and contains the following information: "MAC Address : 00:22:b0:8f:ff:3e" (highlighted with a red box), "Connection : DHCP client Disconnected", "DHCP Renew" and "DHCP Release" buttons, "IP Address : 0.0.0.0", "Subnet Mask : 0.0.0.0", "Default Gateway : 0.0.0.0", and "DNS : 0.0.0.0". The "LAN" section shows "MAC Address : 00:22:b0:8f:ff:3d", "IP Address : 192.168.0.1", "Subnet Mask : 255.255.255.0", and "DHCP Server : Enabled". The "WIRELESS 802.11 G" section shows "SSID : dlink", "Channel : 6", and "Encryption : Disabled". A sidebar on the left contains links for "Device Info", "Log", "Statistics", "Active Session", "Wireless", "Logout", "Internet Offline", and a "Reboot" button. A "Helpful Hints.." section on the right provides additional information about the page's content.
